

## MAPELASTIC AQUADEFENSE TANKING KIT

**Mapelastic AquaDefense Tanking Kit** is a ready to use kit for rapid waterproofing of bathrooms, wet rooms and showers, designed to receive tiles after just 4 hours, without the need to prime.

**Product Code:** 73452KIT

**Consumption:** Mapelastic AquaDefense: 1 kg/m<sup>2</sup> for two coats.

**List Price:** £64.35

**Packaging:** Box containing:

-  7.5 kg Mapelastic AquaDefense (liquid waterproofing membrane ready to use)
-  10 m Mapeband PE 120 (PVC waterproof tape).

**Mapelastic AquaDefense Tanking Kit** can be used to form waterproofing layers before applying ceramic, stone and mosaic finishes in:

-  bathrooms and shower cubicles
-  wet rooms
-  shower cubicles

**Mapelastic AquaDefense Tanking Kit** may be applied to:

-  concrete
-  cementitious screeds and screeds made using special binders (**Topcem, Topcem Pronto, Mapecem or Mapecem Pronto**)
-  plasterboard (for internal applications only) and tilebacker boards
-  existing coatings in ceramic, terrazzo and stone
-  cementitious render

### Advantages:

-  The components of **Mapelastic AquaDefense Tanking Kit** are supplied ready to use.
-  **Mapelastic AquaDefense** is a rapid product:
  - Wait 1 hour after applying the first coat and 3 hours after applying the second coat.
  - Ceramic tiles may be bonded after 4 hours (at +23°C and 50% R.H.) when applied on a suitable substrate such as dry screed with less than 3% residual moisture.
-  **Mapelastic AquaDefense** is elastic: at +23°C it has 3.2 mm crack-bridging capacity without reinforcement.
-  **Mapeband PE 120** is made from polyester mesh and PVC fabric, making it elastic and deformable, as well as being impermeable to water and vapour.
  - pre-formed corners and gaskets are available separately.
