MARBLE RESTORER

MARBLE RESTORATION KIT: REMOVES ACID STAINS AND RESTORES POLISH ON SMALL MARBLE AND TRAVERTINE SURFACES AND ON AGGLOMERATES

POLISHED MARBLE, POLISHED MARBLE AGGLOMERATES

THE KIT CONTAINS

- FILA MARBLEONE YELLOW METAL PAD.
- FILA MARBLETWO WHITE RESIN-COATED PAD.
- FILA MARBLETHREE BLUE RESIN-COATED PAD.
- FILA MARBLESPONGE WHITE POLISHING SPONGE.
- FILA MARBLESHINE, MARBLE POLISH - 200 ML.
- FILA FORMULA MARMO, MARBLE POLISH - 250 ML.
- PROTECTIVE GLOVES.

WHAT IT'S FOR

- Restoring small marble, travertine or polished limestone surfaces, that have been attacked by acidic substances or weather conditions.
- Ideal for restoring bathroom or kitchen worktops, tables, steps, doorsteps, window sills.
- It also eliminates dullness due to wear and tear.
- Effective on marble surfaces and on all polished limestones
- Effective on marble-concrete agglomerates (terrazzo), marble-resin agglomerates with polished finish

MARBLE RESTORATION KIT: removes acid stains and restores the sheen on small surfaces on marble, travertine and agglomerates.

HOW TO USE IT

PHASE 1: SMOOTH

Wet the surface with water and rub first with the yellow **MARBLE ONE** pad, then using the white **MARBLE TWO** pad and, lastly, with the blue MARBLE THREE pad, extending the work surface slightly.
Dry with a cloth or paper towels.

PHASE 2: POLISH

Apply **MARBLE SHINE** and polish using the **MARBLE SPONGE**. Thoroughly remove any residues using a damp sponge and dry with a soft cloth.
These are very generic instructions; for specific information please carefully read the booklet contained in the box.

COVERAGE

COVERAGE (1 KIT):	
HIGH COVERAGE: kit for restoring surfaces (1.5 m^2) with up to 30 damaged areas measuring 6 to 7 cm in diameter.	**5 m^2**

The coverage values are purely indicative and depend on the state of wear of the material.

Packaging

1 kit: 4-piece cartons.

WARNINGS
- Keep out of reach of children.
- Do not disperse into the environment after use.

TEMPERATURES
Storage temperature: from 5° to 30° C.
The product should be applied to materials with temperature between 5° and 30°C.

Caution:
Some marble types, naturally resistant to acids, like "verde alpi" marble, cannot be polished with this treatment system.
Does not work on granite, quartz-resin agglomerates, natural stones that are resistant to acids.
Do not use the product on floors.
