

STAIN-REMOVING SPRAY

TERRACOTTA, QUARRY TILES, MARBLE,
GRANITE, NATURAL STONE, AGGLOMERATES,
CONCRETE

WHAT IT'S FOR

- Removes greasy and oily stains from terracotta, quarry tiles, natural stone, granite, agglomerates, tumbled marble, stones or cobblestones, concrete

ADVANTAGES

- Extremely practical with its easy-to-use spray
- Very effective on external terracotta which is untreated or treated with non-filming products
- Leaves no traces if the stain is fresh
- Also perfect on quarry tiles and natural stone
- Cleans where normal sprays do not reach
- Guarantees excellent performance even on untreated surfaces

HOW TO USE IT

No dilution required: ready to use.

Application:

1. Spray from a distance of 15 cm holding the can at an angle of about 45°.
2. Leave to dry for a few minutes. It absorbs grease deposits and then dries, leaving a thin layer of white powder on the floor.
3. Remove using a brush.
4. Wipe over with a damp cloth. If traces remain, repeat the operation.

If traces remain, repeat the operation.

Packaging

200 mL cans in boxes of 12.

WARNINGS

- Keep out of reach of children.
- Do not disperse into the environment after use.

TEMPERATURES

Storage temperature: from 0°C to 30°C
The product should be applied to materials with temperature between 5° and 30°C.

Caution:

When used on wax-treated floors, you need to remove the wax from the whole tile after removing the stain and then restore the wax coating.
