

FUGAPROOF GROUT PROTECTION

ALL TYPES OF GROUTING

INDOOR
USE

OUTDOOR
USE

- Water-repellent protection
- Dust-proofing action
- Breathable
- Ready to use and easy to apply
- Safe for use with a spray applicator
- Water-based technology: drastically reduces treatment times
- Can be applied to surfaces with residual moisture
- An A+ classified product in accordance with the French VOC regulation

WHAT IT'S FOR

- It protects and strengthens concrete grout joints
- Facilitates dirt removal and routine cleaning
- It helps stop surface stains and water absorption.

HOW TO USE IT

No dilution required: ready to use.

Application: Clean the surface with **FUGANET** grout cleaner. Shake well and spray **FUGAPROOF** directly on the grout joints of the clean surface. Dry excess product residue with a clean cloth.

We recommend applying a second coat on areas at a greater risk of stains (e.g. kitchen, barbecue, garage). The surface can be walked on after 4 hours.

PACKAGING

750 ml bottles with spray nozzle in boxes of 6.

COVERAGE (750 ML):

up to 850 linear metres

Coverage rates are indicative.

WARNINGS

- Keep out of reach of children.
- Do not disperse into the environment after use.
- Protect can from frost.

TEMPERATURES

Storage temperature: Between 5°C and 30°C.
This product must be applied to surfaces with temperature between 10°C and 30°C.

Caution:

Do not wet the surface in the first 24 hours after treatment.
Any dry residues that were not removed during application can be removed with **CLEANER PRO**, diluted 1:30.
